

Dear Sir,

Greetings.

Naandi, which in Sanskrit means a new beginning, is one of the largest and fastest growing social sector organizations in India working to make poverty history.

Mahindra Pride School is a part of the Naandi Foundation with corporate office at Hyderabad started in the year 2007, with a singular objective to make urban, semi-urban & rural youth employable based on their skills. The organization offers various courses and trains the youth and provide employment avenues in the organized sector. Mahindra Pride School envisages training and providing employment to 1 million youth within 10 years.

We look forward to work with you in shaping the future of your students by up-skilling them on Communication, Life Skills, Aptitude, Computer skills and domain knowledge training with assured placements in the ITES sectors. By empanelling with Mahindra Pride School, your students are exposed to the realistic corporate environment and are trained in their respective domains by highly qualified and experienced trainers.

The course content, which is developed in-house, is continually revised and updated, to cater to the skill requirements of the industry.

Respected personalities from various industries are invited to Mahindra Pride School campus on a regular basis for an interaction with our students by which they are updated about the latest trends, news and other developments in the corporate world.

### **Life skills**

The life skills component of the training module completely transforms the students into confident, determined, goal oriented youth; a personality shift essential for them to pursue successful careers in the sectors of their choice.

### **Project Work and Assessment**

The learning with us is designed to be in a very hands-on, minds-on way. Every topic we cover in English, Computer Skills or Domain-relevant subjects, is followed up by practical sessions where students get to apply their knowledge in simulated real-life situations. Role-play, as well as practical project work, is a significant part of our training methodology, and we use state-of-the-art technology, and modern pedagogical methods to deliver our courses.

We make extensive use of videos and podcasts while delivering lessons, and students have access to all the multimedia content, including the slideshows for each lesson, in our well-equipped our computer lab, so that the learning does not stop at the end of the class.

Continuous comprehensive assessments are also in place to record the progress of each student. We make video and audio recordings of students as they present their project work and deliver their English free-speech pieces, and also maintain a portfolio of each student's project submissions. The assessment not only allows us to customize and tweak our training to make it more effective, but also means that we can match our students to the employer's expectations in a better, more informed way.

### **Job Readiness**

Toward the last leg of the course, a more concentrated effort is started at making the student job-ready. Students are trained in interview preparation, including body language, grooming and

effective communication skills. Exhaustive mock interviews are conducted, and students are given continuous feedback after each interview, so that they learn to use their positive traits and work towards overcoming their shortcomings.

### **Placements in MPS**
