

UG SOCIAL AWARENESS PROGRAM/ SERVICE LERANING (CHOICE BASED CREDIT SYSTEM)

SYLLABUS (Effective from the academic year 2023 – 2024)

STELLA MARIS COLLEGE (AUTONOMOUS) CHENNAI 600086 Undergraduate Programmes

SOCIAL AWARENESS

(Effective from the academic year 2023 – 2024)

Guidelines for the conduct of the course

COURSE DESCRIPTION

The Social Awareness course (SA) of the College enables students to understand and react appropriately to both the problems and needs of society and the interpersonal struggles of the members of the communities around them. It trains and sensitises them to become aware of their environment, the different social contexts in which they interact, as well as interpret the emotions of people with whom they communicate. Students will improve their skills in connecting with others verbally and non-verbally, acquire higher levels of emotional intelligence, the ability to empathise with others and understand the roles they play in society.

OBJECTIVES OF THE COURSE

- To enable students to respect and appreciate cultural diversity
- To foster and nurture the ability to empathise with others and individual selves
- To facilitate the acquisition of the attitudes, skills, and knowledge to function in different environments and among different communities
- To enable them to communicate effectively and appropriately in different social contexts

COURSE LEARNING OUTCOMES

On successful completion of this course, the students will be able to

- Understand diverse culture and social norms
- Respond in appropriate ways to the problems and interpersonal struggles of members of different communities
- Empathise with issues and problems faced by people and groups from diverse backgrounds and cultures
- Identify resources to meet with the challenges of diversity and difference
- Understand social justice issues
- Evaluate impact of their interactions and work with communities

Service orientation Guidelines:

- Students are expected to earn 2 credits for SAP
- Departments may choose any one of the given course topics
- Classroom sessions to be activity-based wherever possible
- Visits to communities is a course requirement
- Students are expected to engage and interact with the community, reflect on their experiences and make notes in their journals
- Class room sessions and Field Visits to relevant communities form the major components of the course. The faculty facilitator is expected to arrange for the visits to the community with the help of the SAP Coordinator. They may choose to go either in the morning or afternoon. If in the morning (Aided Sections) they may choose a day on which there are no common class hours (Language, English, GE) and exchange hours with the major subjects teachers. The same protocol holds for Shift II. They may choose a day on which there are no common class hours in the afternoon (Language, English, GE) and exchange hours from the major subject teachers.
- Faculty facilitators are expected to prepare the students for field visit to the community with specific background information.
- Activities to be completed three weeks before the end of the semester.
- Faculty to submit a report on the entire programme to the SAP coordinator and a copy to be retained with the department. (Please include photographs (geotagged), letters, videos, the impact assessment report {community and student} self –reflection journals (two/three samples) and any other additional material that would support the report)

They may request the SA Coordinator for resource persons for inputs on specific areas.

SERVICE LEARNING

(Effective from the academic year 2023 – 2024)

Guidelines for the Conduct of the Course

COURSE DESCRIPTION

Service Learning (SL) is a course-based experiential learning that engages students in service to the community as an integrated aspect of a course. Students participate in an organised service activity that meets identified community needs and integrates the service activity to gain further understanding of course content, a broader appreciation of the discipline and an enhanced sense of personal values and civic responsibility. This method is seen as an effective way to enable students to achieve required learning outcomes through service to the community. Service Learning seeks to advance the goals of the curriculum.

The course promotes mutual learning experiences for both students and members of the community. The focus is on students reflecting on their experience of doing and learning i.e. active learning.

OBJECTIVES OF THE COURSE

- To enhance academic learning by challenging students to apply their subject knowledge and critical thinking to real-world situations
- To increase understanding of theoretical issues being addressed in the classroom
- To direct the students into practical settings where the objective is to serve the community
- To encourage reflection as a self-guided method for change and learning
- To develop skills necessary to establish and maintain relationship with communities
- To enable students to help communities learn and benefit through their active service inputs and facilitation

COURSE LEARNING OUTCOMES

On successful completion of this course, the students will be able to

- Make strong connections between curricular and experiential learning
- Reflect on how thoughts and actions impact the development of supportive and inclusive communities
- Reflect and document connections between knowledge and skills resulting from classroom learning and service-learning experiences
- Demonstrate skills in establishing and maintaining relationships with communities
- Evaluate impact/benefit of SL activities and interactions in communities

Stages for Service Component

- Preparation for meeting community needs with the curriculum of selected course for the SL pedagogy
- Community interaction
- Reflection and learning on the service component

Students will get two credits on completion.

Guidelines for conduct of course

SL should be utilised as pedagogy, not just a learning tool. It should be integrated into the course/module content and the class activities, with clearly identified learning outcomes and assessment methods.

A community partner/s should be identified, their needs assessed, and the appropriate partner selected. Faculty members should attend Partnership Events hosted by the SL Coordinator in order to cultivate and reinforce community partnerships.

Learning should include preparing the students to network, establish contact and interact with partner communities through service activities.

Faculty should prepare students for active engagement in the community and encourage them to **reflect critically** on their experience. Faculty should use rubrics to evaluate students' progress before, during and after the service learning programme.

Students should leave the service learning experience with a deeper and even changed understanding of themselves, the communities they work with, and their potential to participate in the civic life of communities, country, and world.

Service Learning as pedagogy creates the opportunity for students to try and live out the core principles and values of the institution.

SERVICE LEARNING

SYLLABUS

(Effective from the academic year 2023-2024)

HERITAGE AWARENESS

Awareness of Chennai's architectural heritage

CODE:23HS/SL/HA52 CREDITS: 2
TOTAL HOURS: 26

OBJECTIVES OF THE COURSE

- To enable students gain knowledge about the architectural heritage of Chennai and ways of preserving it.
- To provide them with practical experience of heritage conservation campaigns
- To help them acquire knowledge about institutions and organizations involved in the conservation of Chennai's architectural heritage.
- To create awareness of this heritage among the school students of Chennai through interaction with selected schools
- To develop teamwork, organisation, and communication skills necessary to work with communities and implement conservation strategies.
- To equip students with skills to envisage, plan and work out sustainable strategies for heritage conservation

COURSE LEARNING OUTCOMES

On successful completion of this course, the students will be able to

- Understand the value of heritage and the challenges involved in practical conservation
- Make strong connections between the architectural heritage students study about as part of their curriculum and their experiences.
- Explain ideas and concepts to school children to introduce them to Chennai's architectural heritage and what is needed for its conservation
- Adapt classroom learning to create a community-based programme of awareness and conservation of architectural heritage.
- Collaborate with and support organisations/institutions operating in the field of heritage conservation.

Unit 1

Introduction to Service Learning

(2hours)

- 1.1 Service Learning Principles- engagement, reflection, reciprocity, public dissemination
- 1.2 Meaning of community and understanding of community dynamics
- 1.3 Project planning stages and ethical concerns

Activity-based preparation

(6 hours)

- 2.1 Importance of Heritage and Conservation
- 2.2 Heritage of Chennai City
- 2.3 Heritage Conservation Organisations in Chennai (INTACH, Madras Inherited, Archaeological Survey of India etc.)

No End-Semester Examination

Evaluation Total Marks: 50

Journal Writing / Class Presentations (individual or group) / Documentation (photos with captions, short reports in portfolio Format)

B.V.A. DEGREE: BRANCH X – VISUAL ARTS

SERVICE LEARNING

SYLLABUS

(Effective from the academic year 2023-2024)

ART FOR CHILDREN

CODE: 23FA/SL/AC52 CREDITS: 2
TOTAL HOURS: 26

OBJECTIVES OF THE COURSE

- To understand the relevance of service learning
- To explore the scope of engaging with institutions/organisations
- To acquire knowledge about teaching art to children
- To develop skills necessary to work with children
- To develop creative skills in art/design activities for children

COURSE LEARNING OUTCOMES

On successful completion of this course, the students will be able to

- Make strong connections between curricular and experiential learning
- Employ critical thinking skills in a variety of contexts
- Reflect and document connections between knowledge and skills, resulting from classroom learning and service-learning experiences
- Work with organisations/institutions operating for children
- Plan and implement art/design activities for children

Unit 1

Introduction to Service Learning

(2 hours)

- 1.1 Service Learning Principles- engagement, reflection, reciprocity, public dissemination
- 1.2 Meaning of community and understanding of community dynamics
- 1.3 Project planning stages and ethical concerns

Unit 2

Art/design activities for community

(6 hours)

Ideation, planning and preparatory work

Unit 3

Implementation

(18 hours)

- 3.1 Visits to the field/community
- 3.2 Impact analysis and documentation

PATTERN OF ASSESSMENT

No End Semester Examination

Evaluation: Total Marks: 50

Journal writing/class presentation/participation in and contribution to art/design activity

B.Sc. DEGREE: BRANCH IV – CHEMISTRY

SERVICE LEARNING

SYLLABUS

(Effective from the academic year 2023 - 2024)

POLLUTANTS AND ADULTERANTS

CODE: 23CH/SL/PA52 CREDITS: 2

TOTAL HOURS: 26

OBJECTIVES OF THE COURSE

- To enable students to acquire knowledge about adulterants and spread the awareness to communities
- To help them, develop skills and present basic inputs on pollutants and their harmful effects
- To enable them envisage, plan and work out strategies in functioning with communities sustainably.

COURSE LEARNING OUTCOMES

On successful completion of this course, the students will be able to

- Enhance their classroom learning in the subject
- Employ critical thinking skills on importance of air, soil and water quality and management
- Understand the common adulterants and pollutants and apply this knowledge in daily life
- Apply their learning in real life situations and help communities learn
- Demonstrate skills in establishing and maintaining relationship with communities
- Apply the knowledge acquired about the services available for the communities they work with

Unit 1

Introduction to Service Learning

(2 hours)

- 1.1 Service Learning Principles engagement, reflection, reciprocity, public dissemination
- 1.2 Meaning of community and understanding of community dynamics.
- 1.3 Project planning stages and ethical concerns

Activity-based preparation

(6 hours)

- 2.1 Salient features of PFA Act, Common adulterants in ghee, turmeric powder, chilli powder, sugar, pepper, tea and coffee powder, flour; tests to detect adulteration (Basic principles)
- 2.2 Types of Food contaminants (Pesticide residues, bacterial toxins mycotoxins, seafood toxins, metallic contaminants, residues from packaging material)
- 2.3 Types of pollution water, air and soil; types of pollutants-sources and their effects Gaseous pollutants Oxides of carbon, sulphur, nitrogen, particulate matter Water pollutants-Biological agents, physical agents and chemical agent Eutrophication biomagnification and bioaccumulation Soil Pollutants- Pesticides, biomedical waste and e-waste

Unit 3

Field Work (13 hours)

Includes visits to the field/community

Impact analysis; Documentation; Reflection and Recommendation (5hours)

PATTERN OF ASSESSMENT

No End-Semester Examination

Evaluation: Total Marks: 50

Journal Writing / Class Presentations (individual or group) / Documentation (photos with captions, short reports in portfolio format)

B.Sc. DEGREE: BRANCH V. A. PLANT BIOLOGY AND PLANT BIOTECHNOLOGY

SERVICE LEARNING

SYLLABUS

(Effective from the academic year 2023 - 2024)

PLANTS AND PEOPLE

CODE: 23BT/SL/PP52 CREDITS: 2
TOTAL HOURS: 26

OBJECTIVES OF THE COURSE

- To enable students to become sensitive to the needs of society and communities
- To help them develop skills necessary to establish and maintain relationship with communities
- To equip with skills to envisage, plan and work out sustainable strategies in relation to their course to benefit the community

COURSE LEARNING OUTCOMES

On successful completion of this course, the students will be able to

- Distinguish strong connections between curricular and experiential learning
- Report and document connections between knowledge and skills, resulting from classroom learning and service-learning experiences
- Collaborate with organisations/institutions operating in/for the communities they work with by using their programmes and services.
- Demonstrate skills in establishing and maintaining relationship with communities
- Develop, plan and work out strategies in working with communities

Unit 1

Introduction to Service Learning

(2 hours)

- 1.1 Service Learning Principles- engagement, reflection, reciprocity, public dissemination
- 1.2 Meaning of community and understanding of community dynamics.
- 1.3 Project planning stages and ethical concerns

Unit 2

Activity-based preparation

(6 hours)

- 2.1 Nutritive and medicinal value of plants: Growing Microgreens, Importance of Indigenous trees.
- 2.2 Ayurveda / Siddha Medicines for Common Ailments:
 - 2.2.1 Preparation of Infusion and Decoction, Mouth wash and Herbal Tooth Powder, Tailam, Churnam, and Leghyam.
 - 2.2.2 Preparation of Herbal Tea and Soups
 - 2.2.3 Facial and Hair Care using Herbal products.

Field Work (13 hours)

Includes visits to the field/community

Impact analysis; Documentation; Reflection, Recommendation and follow-up

(5 hours)

SERVICE LEARNING

SYLLABUS

(Effective from the academic year 2023-2024)

FAUNAL DIVERSITY AND CONSERVATION

CODE:23ZL/SL/DC52

CREDITS: 2 TOTAL HOURS: 26

OBJECTIVES OF THE COURSE

- equip them with skills to envisage, plan and work on sustainable strategies
- To enhance students' academic learning by challenging students to apply their subject knowledge and critical thinking to real-world situations
- To increase their understanding of theoretical issues being addressed in the classroom
- To direct them into practical settings where the objective is to serve the community
- To encourage reflection as a self-guided method for change and learning
- To enable students to acquire and disseminate knowledge about faunal diversity, its documentation and conservation
- To help them develop and disseminate skills necessary to identify and document faunal diversity

To COURSE LEARNING OUTCOMES

On successful completion of this course, the students will be able to

- Make strong connections between curricular and experiential learning
- Employ critical thinking skills in the context of conservation
- Learn skills for identifying and documenting fauna on campus
- Prepare a compilation of the fauna observed and identified on campus
- Reflect and document connections between knowledge and skills, resulting from classroom learning and service-learning experiences
- Envisage, plan and work on sustainable strategies for sustaining campus fauna

Unit 1

Introduction to Service Learning

(2hours)

- 1.1 Introduction to Service Learning Service to the Community Learning through service identifying the community for creating awareness on faunal biodiversity and conservation
- 1.2 What is biodiversity? Need for biodiversity conservation Broad classification of biodiversity Urban biodiversity Sustaining urban biodiversity

Unit 2

Activity Based Preparation

(6hours)

- 2.1 Workshop on faunal survey methodology
- 2.2 Surveys on campuses Identification of fauna documentation

Field Work (13hours)

Field visits - Sharing methodology and skills with students Survey of campus habitats and suggestions for conservation – preparation of booklet based on the survey Self-reflection and analysis - Report of experience (5hours)

Journal Writing / Class Presentations (individual or group) / Documentation (photos with captions, short reports in portfolio format)

B.Sc. DEGREE: BRANCH VI A- ADVANCED ZOOLOGY AND BIOTECHNOLOGY SERVICE LEARNING

SYLLABUS

(Effective from the Academic Year 2023-2024)

HEALTH AND HYGIENE

CODE:23ZL/SL/HH52 CREDITS: 2
TOTAL HOURS: 26

OBJECTIVES OF THE COURSE

- To enhance student's academic learning by challenging students to apply their subject knowledge and critical thinking to real-world situations
- To increase student's understanding of theoretical issues being addressed in the classroom
- To direct the students into practical settings where the objective is to serve the community
- To encourage reflection as a self-guided method for change and learning
- To enable students to become sensitive to the needs of society and communities
- To develop skills necessary to establish and maintain relationships with communities in relation to aspects of health and hygiene
- To equip students with skills to envisage, plan and work on sustainable strategies for communities to engage with in relation to health and hygiene

COURSE LEARNING OUTCOMES

On the successful completion of this course, the students will be able to

- Make strong connections between curricular and experiential learning
- Reflect on how thoughts and actions impact the development of supportive and inclusive communities
- Reflect and document connections between knowledge and skills, resulting from classroom learning and service-learning experiences
- Understand the services and needs of communities in relation to aspects of health and hygiene
- Demonstrate skills in establishing and maintaining relationships with communities
- Envisage, plan and work on sustainable strategies that benefit personal and health of the community

Unit 1

Introduction to Service Learning

(2Hours)

- 1.1 Introduction to Service Learning- Learning through service Assessment of community needs-Preparation for translating knowledge to community-Modes of presentation- Awareness programmes
- 1.2 Concept of Personal and Environmental hygiene and its impact on health.
- 1.3 Environment and Hygiene: Pollution Waste management- Clean surroundings.

Activity-based preparation

(6 Hours)

2.1 Communicable diseases: Causative agent-mode of infection and preventive measures for the following diseases:

Air borne – Tuberculosis, Measles, and SARS

Water borne – Amoebiasis, Typhoid, Jaundice, Leptospirosis

Sexually transmitted – HIV-AIDS, Syphilis and Gonorrhoea

Diseases spread by mosquitoes – Malaria, Filariasis and Dengue Fever

2.2 Non- Communicable diseases: Causes, symptoms and management of the following:

Diabetes, Hypertension, Cancer (Oral, breast and Cervical) and Thyroid disorders.

2.3 Women and Health: Hygiene during menstrual period, Birth-Impact of marriages between close relatives.

Unit 3

Field Work (13 hours)

Visit to community/Schools

Self-reflection, Analysis – Report writing/documentation.

(5 hours)

Evaluation: Total Marks: 50

Journal Writing / Class Presentations (individual or group) / Documentation (photos with captions, short reports in portfolio Format)

BACHELOR OF COMPUTER APPLICATIONS

SERVICE LEARNING

SYLLABUS

(Effective from the academic year 2023 – 2024)

COMPUTER BASICS

CODE:23CS/SL/CB52

CREDITS: 2 TOTAL HOURS: 26

OBJECTIVES OF THE COURSE

- To enable students to become sensitive to the needs of society and communities
- To develop skills necessary to establish and maintain relationships with communities
- To enable students to use their computer skills to teach school students computer basics (operating system, files, folder and components of a computer, basics of word processing)

COURSE LEARNING OUTCOMES

On successful completion of this course, the students will be able to

- Make strong connections between curricular and experiential learning
- Reflect and document connections between knowledge and skills, resulting from classroom learning and service-learning experiences
- Demonstrate skills in establishing and maintaining relationship with communities
- Transfer knowledge and skills they have gained in class to new situations within and beyond their academic courses
- Demonstrate knowledge and gain teamwork skills by actively participating in imparting basic computer skills to the community

Unit 1

Introduction to Service Learning

(2Hours)

- 1.1 Service Learning Principles- engagement, reflection, reciprocity, public dissemination;
- 1.2 Meaning of community and understanding of community dynamics.
- 1.3 Project planning stages and ethical concerns

Unit 2

Activity-based preparation

(6 Hours)

Preparation of resource materials and activities to teach

- 2.1 Components of Computer System
- 2.2 Input/output Devices Hardware and Software Connecting keyboard, mouse, monitor and printer to CPU and checking power supply

- 2.3 Operating System Popular Operating Systems User Interface Icons Common
 Icons, Status Bar, Using Menu and Menu-selection File, Folders and Directories Creating and Renaming of files and folders Using help Creating Short cuts
- 2.3 Understanding Word Processing Opening and Closing of documents Text creation and manipulation formatting of text -Table handling Spell check, language setting and thesaurus -Printing of word document

Field Work

Includes visits to the field/community/schools (13 hours)
Impact analysis; Documentation; Reflection, Recommendation and follow-up. (5 hours)
